CAREER OBJECTIVE

Motivated B.Tech student specializing in Information Technology with strong foundations in Python, Machine Learning, and Web Development. Seeking opportunities to apply technical skills to real-world projects and gain hands-on industry experience.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, SQL

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Backend: FastAPI, REST APIs

AI/ML: Machine Learning, Generative AI, Prompt Engineering, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Postman, Power BI

Core Concepts: Data Structures & Algorithms, DBMS, Object-Oriented Programming (OOP)

PROJECTS

Early Warning System | *Python, Machine Learning*

- Developed an early warning system to analyze data and identify potential risks or critical events using predictive analytics.
- Implemented data processing and machine learning techniques to improve timely detection and decision-making.

Sneakers Website | *Frontend Web Development Project*

- Developed a responsive e-commerce sneaker website with an intuitive user interface and product showcase pages.
- Implemented mobile-friendly design and interactive features to enhance user experience and accessibility.

Restaurant Analytics and Rating Prediction | *Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Folium*

- Performed data cleaning, preprocessing, descriptive analysis, and geospatial analysis on 9,551 restaurant records to identify trends across cities, cuisines, and customer ratings.
- Analyzed the impact of table booking, online delivery, and price range on restaurant ratings and customer preferences through statistical and visual analysis.
- Applied feature engineering by creating and encoding new variables to improve data quality and model performance.
- Developed and evaluated Linear Regression and Random Forest models to predict restaurant ratings, supported by interactive visualizations and business insights.

Alumni Database Management System | *Java, NetBeans, JDBC, MySQL*

- Designed and developed a desktop application to centralize alumni registration, profile management, and record search for educational institutions.
- Implemented full CRUD (Create, Read, Update, Delete) operations and integrated a MySQL database using JDBC for seamless data management.
- Developed an intuitive graphical user interface and structured the database schema for efficient storage, retrieval, and maintenance of alumni records.

MarketMind - AI-Powered Investment Research Platform | *React.js, FastAPI, Python, REST APIs*

- Developed a full-stack web application for real-time stock market analysis and portfolio tracking.
- Integrated AI-based investment recommendations, technical indicators, sentiment analysis, and interactive stock charts.
- Implemented AI-generated investment reports, price prediction, and an AI chatbot for stock-related queries.

EDUCATION

B.Tech - Information Technology

Garden City University | 2023 - 2027 | CGPA: 9.0

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation - Forage
- Tata - GenAI Powered Data Analytics Job Simulation - Forage
- Data Science Essentials with Python - Cisco
- Artificial Intelligence & Machine Learning - Infosys
- Introduction to Modern AI - Cisco
- Full Stack Development Training - Infosys
- Deep Learning with Keras - Coursera
- Software Testing and Automation Specialization - Coursera
- Building Your First AI Agent with LangChain - Coursera

SOFT SKILLS

Problem Solving, Communication, Teamwork, Adaptability, Time Management
